GaspiWell

Nurturing Every Breath, Fostering Healthy Lungs

GaspiWell is prepared using Fingerprint mapping technology to ensure the quality, bioavailability & stability of the product.

Licorice having detoxifying, antioxidant, antimicrobial & anti-inflammatory activities

Ephedra contains Ephedrine, an alkaloid used as a decongestant

Bitter Almond have antimicrobial & immunomodulatory activities

Gypsum Fibrosum is used to prevent respiratory diseases

GaspiWell has immunomodulatory, antimicrobial, and mucolytic properties. It comprises phytomolecules, flavonoids, and antioxidants. It is an active ingredient-based recipe to remove the mucus plug, boost respiratory activity, and improve appetite.

Licorice More than 300 flavonoids & 20 tri-terpenoids are isolated from licorice plant. Among them, Glycyrrhizin, Glycyrrhetinic acid, Liquiritigenin, Licochalcone A&E, and Glabridin are the main active compounds. These compounds possess anti-inflammatory, mucolytic & antimicrobial properties.

Ephedra contains 29 active phytomolecules which are used to treat nasal congestion, bronchial spasms and respiratory symptoms. It removes thick mucoid plug to provide instant respiratory relief in birds.

Bitter Almond extracts are rich sources of fatty acids, flavonoids, phytosterols, lipid soluble vitamins and phenolic compounds. These compounds possess potent anti-microbial, anti-inflammatory & immunomodulatory properties.

Gypsum Fibrosum is well known for it's antipyretic & anti-asthmatic properties.
