OL-VAC

Inactivated vaccine against Newcastle Disease (Long Lasting Protection)

Description

OL-VAC is an inactivated vaccine prepared by highly immunogenic strain of the Newcastle Disease virus through back passage technology. Olvac provides wider cross protection against G2 and G7 due to its back passage technology.

Composition

1 dose of vaccine contains:
Inactivated Newcastle Disease virus: (La Sota) **100 PD₅₀**

Mode of action

Produce protective titer of antibodies against Newcastle disease that will give high immunogenicity and long lasting protection.

Prevention

New Castle Disease.

Administration and Dosage

- Subcutaneously in the neck or in breast muscle.
- The dose is **0.5 ml** per bird for layers, breeders and grand Parents.
- The recommended dose is 0.3 ml per bird for broilers at 5th-6th day of age (The dose and schedule of OL-VAC can be adjusted by veterinarian according to farm history and epidemiology of area)

Contraindications and precautions

Allow vaccine to reach at room temperature before its usage.
Shake vial well before its usage.

Storage

Store in a refrigerator at
+2°C to +8°C (avoid freezing)

Shelf life

24 months

Packing

500 ml bottle
