# VAIOL-VAC

## Freeze dried Live Vaccine against Fowl Pox

### Description

**VAIOL-VAC** is a freeze dried live vaccine against Fowl Pox prepared using attenuated strain of Fowl Pox.

### Composition

1 dose of vaccine contains:  
Live attenuated fowl pox strain-2(HP2)

### MODE OF ACTION

Provides Protection against Fowl Pox by establishing immunity in just 10 days after vaccination.

### Indications

Fowl Pox

### Administration and Dosage

Dissolve the vial in given diluent and shake it well to make dilution complete. Dip the needles of apposite applicator given into prepared vaccine. Pierce the **Wing Web/cutaneous fold** with the needle.

Onset of nodular swelling on site of inoculation after 6 days means vaccine remain successful.

In Grand Parents, Breeders and Layers **VAIOL-VAC** is recommended at 4th-6th week of age.

### Contraindications and precautions

Allow vaccine to reach room temperature before use.

Shake vial well before and during use.

Use one needle for 1000 birds.

### Storage

Store in a refrigerator at +2°C to +8°C (avoid freezing)

### Shelf life

24 months

### Packing

1000 doses
